

Janel Wooton is a Sales Director for Repeated Signal Solutions, Inc (RSS). She works with the cellular carriers and large client venues with complex stakeholders across hospitality, entertainment, commercial enterprise, healthcare, and education to provide long term in-building solutions for wireless coverage. She has held senior sales and leadership roles for international enterprise technology companies in the hospitality space and directed diverse and hard-working teams delivering world class results since 2003. Her athletic experience instilled the values to achieve success for her companies and clients. She created the opportunity to help others “win the trophies” in her professional career and community work.

Janel has had the opportunity to serve professional and nonprofit boards for more than 18 years including Trips for Kids Denver/ Boulder, HSMAI (Denver chapter), HFTP (Rocky Mountain Chapter) and Colorado Youth at Risk (CYAR) Denver.

Janel attended Concordia University, St Paul, MN (94-96) and obtained BA and BS in Communications and Marketing before pursuing post graduate studies. Her pursuit of undergraduate studies was both a part of her vision as a student-athlete in high school, and made possible through MSHSL’s Triple A Award (Academics, Arts, and Athletics) scholarship earned at the rural northern Minnesota Cherry High School and Concordia University’s award of a multi-year merit scholarship for Academics, Arts, and Athletics.

While the values and opportunities to learn from others and win as a team drove opportunities professionally, she continued to train and take on new adventures in sports. Janel rode in the MNCSA Subaru Series and competed professionally in XC (Cross Country) mountain bike racing for 6 years as well as 2 years of 24-hour mountain bike races (24 Hours of Adrenaline Series) in both solo and team rosters. She also enjoys sand/ beach volleyball, skiing, snowboarding, and even the shoveling in the winter of their home in Park City, UT. She and her husband Tom welcomed their daughter Clara in December 2021 and have discovered a different kind of cross training and “24 hours of adrenaline” as new parents.
